

AtliQ Grands

The Perfect Place to Stay

AtliQ Grands Market Share Recovery Dashboard

- By Subhadip Nandi (Data Analyst)

AtliQ Grands

AtliQ Grands is a **premium hospitality chain** operating in the luxury/Business hotel segment. They have been in the hospitality industry for the past 20 years. Known for its commitment to exceptional guest experiences, AtliQ Grands manages multiple upscale properties across 5 cities in India.

The company focuses on:

- Delivering high-quality service in the **hospitality and tourism industry**
- Continuously improving **operational efficiency**
- Enhancing guest satisfaction through **data-driven decision-making**
- With departments ranging from **Front Office** to **Housekeeping, Room Service, and Food & Beverages**, AtliQ Grands aims to optimize costs, increase revenue, and maintain high occupancy and satisfaction levels.

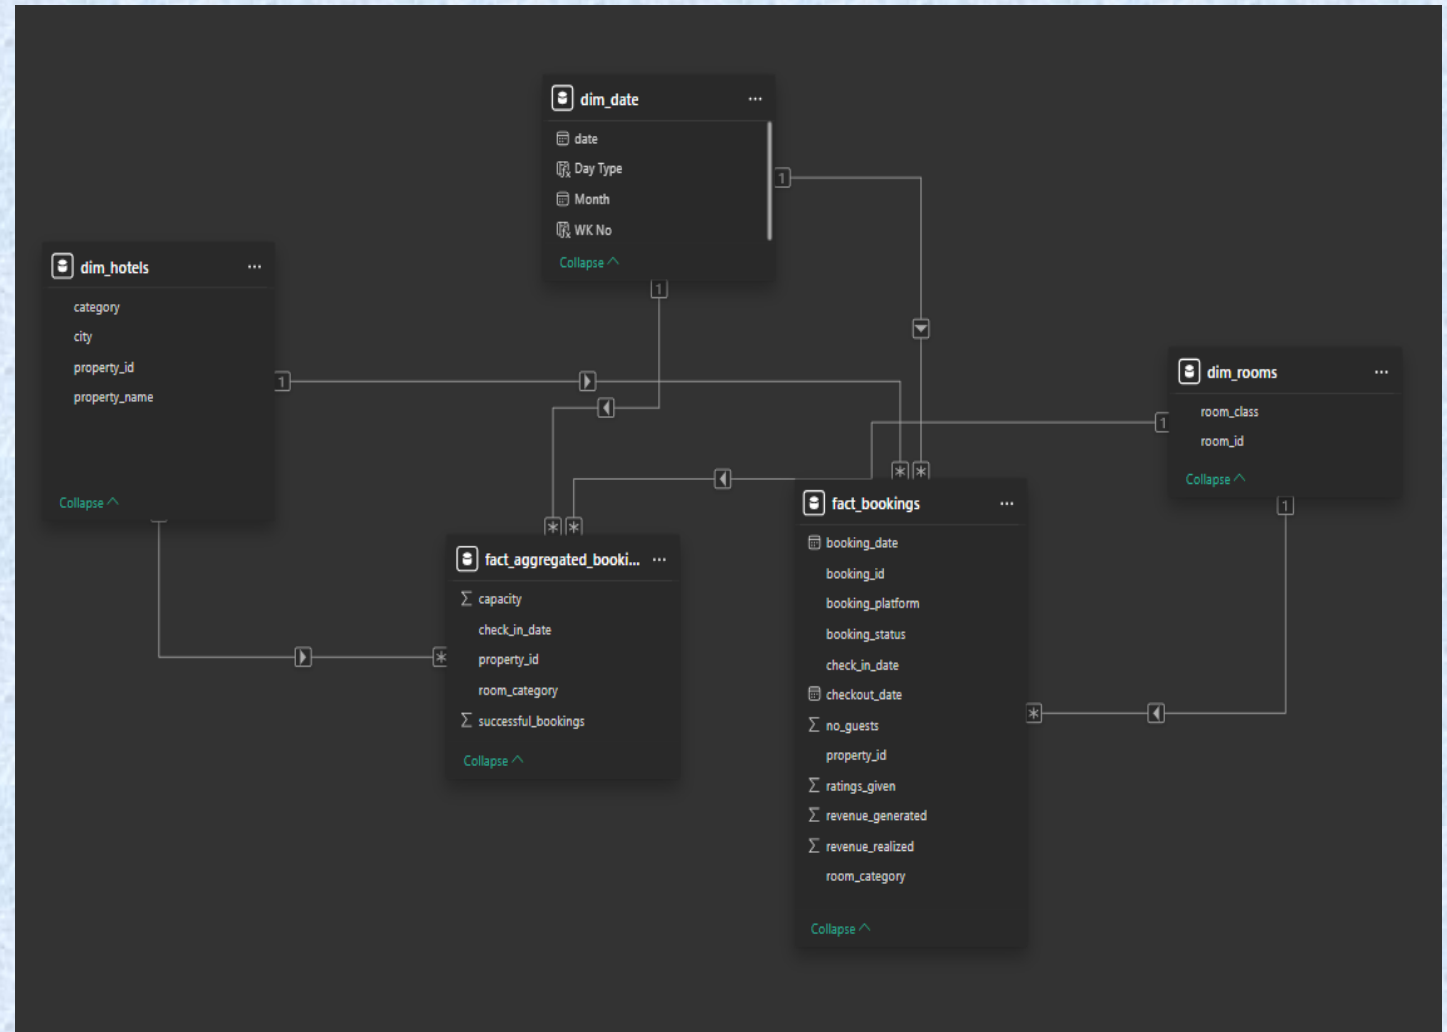

Problem Statement :

-Due to strategic moves from other competitors and ineffective decision-making in management, AtliQ Grands are losing its market share and revenue in the luxury/business hotels category.

Data Sources :

They have provided 5 csv files :

1. dim_date
2. dim_hotels
3. dim_rooms

Booking Platform's Performance

DSRN = Daily Sellable Room Nights,

RevPar = Revenue Per Available Room,

ADR = Average Daily Rate,

DURN = Daily Utilized Room Nights,

DBRN = Daily Booked Room Nights.

Revenue & Occupancy Performance

- **Total Revenue:** ₹1.71B, showing a **+7.23% WoW growth**, but **Occupancy** dropped by **0.96% WoW** to **57.9%**, indicating rooms are not being filled proportionally to revenue gains.
- **RevPar** (Revenue Per Available Room) decreased **0.93% WoW** to ₹7,350 despite stable ADR (+0.03%), meaning occupancy decline is pulling RevPar down.
- **Daily Sellable Room Nights (DSRN)** improved by **8.24% WoW**, suggesting capacity increased but is underutilized.

Category-Wise Revenue Split

- **Luxury segment** contributes ₹1.05B (**61.6%** of total revenue) vs. **Business segment** ₹0.66B (**38.4%**).
- Overdependence on Luxury segment.

Weekday vs Weekend Trends

- **Weekday revenue:** ₹1.28B with 58.6% occupancy.
- **Weekend revenue:** ₹0.43B with lower 55.7% occupancy.
- ADR remains almost the same across weekdays (₹12,699.17) and weekends (₹12,687.05), indicating **price is not a driver for occupancy dips**.

Platform Performance

- **Highest ADR:** “direct offline” (₹12,791), lowest **ADR:** “direct online” (₹12,634).
- Realization % is fairly uniform (~70%), but “Tripster” has the lowest at **69.83%**, hinting at weaker booking conversion efficiency.

Operational Pain Points

- **High Cancellation Rates:** Multiple properties have >25% cancellations (e.g., property 16562 in Delhi with 25.3%), reflecting booking instability.
- **Low Ratings:** 6+ properties rated ≤3.1, suggesting customer dissatisfaction — a competitive weakness.
- **Occupancy Gap:** Despite high ADR in premium cities, occupancy <60%, meaning pricing may not be aligned with demand.

City & Property performance

- **Revenue Concentration:** The top 3 revenue-generating properties are all in Mumbai — **Property 16559 (₹118.45M)**, **16563 (₹101.51M)**, and **17559 (₹94.00M)** — together contributing ~**18.5%** of the total revenue shown in the table, highlighting high dependency on a single city.
- **Performance Gap in ADR:** ADR ranges from **₹8,677.68 (Hyderabad – Property 18561)** to **₹16,606.10 (Mumbai – Property 17564)**, showing a **91% price gap** between lowest and highest priced properties, which may reflect positioning and quality differences.
- **Service Quality Concern:** Several properties have **average ratings below 3.0** — e.g., **Mumbai (2.3, Property 17564)**, **Hyderabad (2.3, Property 18559)**, **Bangalore (2.4, Property 17562)** — posing a risk to brand perception and repeat bookings.

Recommendations

- Boost Occupancy with Targeted Campaigns:** Launch weekend-focused promotions and corporate travel packages for business hotels to close the **3%+ occupancy gap** between weekdays and weekends, while leveraging underutilized capacity (DSRN up **8.24% WoW**).
- Diversify Revenue Sources:** Reduce reliance on the luxury segment (**61.6% of revenue**) by increasing business-category offerings, such as mid-tier rooms, meeting facilities, and bundled corporate services.
- Improve Guest Satisfaction & Ratings:** Prioritise service quality upgrades for low-rated properties (≤ 3.0 average rating), especially in Hyderabad, Bangalore, and certain Mumbai properties, to strengthen repeat bookings and brand trust.
- Reduce Cancellations & No-Shows:** Implement flexible booking policies, targeted pre-stay engagement, and loyalty incentives to cut cancellation rates ($>25\%$ in multiple properties), which directly impact revenue stability.
- Optimise Pricing & Platform Efficiency:** Re-evaluate ADR strategy in cities with high ADR but low occupancy ($<60\%$) to align pricing with demand, and improve conversion efficiency on weaker platforms like “tripster” (Realisation % **69.83%**).
